## Our Mission

The Graystone Society is a not-for-profit educational institution focused on broadening an understanding of the iron and steel history of Coatesville, Chester County, Southeastern Pennsylvania, the region, and nation, to audiences of all ages and interests, by collecting, preserving, exhibiting, and interpreting iron and steel's history, as well as, contributing to its local economies in a meaningful way.

## Our Vision

The National Iron and Steel Heritage Museum of the Graystone Society is a vibrant place where people encounter, explore and learn about the past. With diverse audiences and Chester County's unique heritage at its core, the Graystone Society is an educational leader in the history community of the Delaware Valley. In pursuit of this vision, the Graystone Society will:

- Identify, collect and exhibit significant historical materials related to the iron and steel history community of the Delaware Valley
- Provide leadership in the responsible preservation of and public access to these historical materials
- Encourage excellence in research, documentation and interpretation of historical materials
- Present exhibitions that use historical materials to enrich the public's understanding and appreciation for the iron and steel heritage of Coatesville, Chester County and Southeastern Pennsylvania region
- Foster an appreciation of the importance of historical materials to enrich public understanding of the past and the creation of an improved future
- Serve diverse audiences through a variety of learning formats
- Promote pride in both individual and community heritage
- Respond to the community's needs to explore and examine issues critical to its past and application to contemporary life
- Provide support to historic preservation initiatives in the Chester County region
- Maintain mutually beneficial relationships and alliances with educational institutions, the business community and civic organizations

## Report from the President

In 2016, the National Iron & Steel Heritage Museum took a major step forward in the creation of an expanded education center and museum. We acquired the 120" rolling mill and motor house buildings from ArcelorMittal, the present operators of the Coatesville steel site.

Coatesville has been actively producing iron and steel since 1810. The 120" rolling mill and motor house buildings were built as part of the World War II effort, in which Lukens Steel Company manufactured steel plates for our nation's defense technologies. Production halted in these buildings in the 1980s. Efforts for NISHM to acquire these buildings began in 1995, when Lukens helped form the idea to reuse an industrial building on the plant grounds for community purposes. The transfer of property was put off for many years, due to ownership changes at the steel site. It finally became a reality last year, with the help of current plant manager Ed Fry and his ArcelorMittal team. I would like to thank ArcelorMittal for their willingness to donate such a historic property to NISHM, and especially to Ed Fry, who made the transfer a priority.

The property acquisition adds immense exhibit space to our museum, which will allow us to showcase visitor displays, large-scale exhibits, and objects of iron and steel processes and products. It also allows us to establish a publically accessible home for the tons of World Trade Center steel in our collection. The expanded museum will also create an important regional cultural resource and tourism destination, playing a crucial role in the revitalization of Coatesville and adding to Chester County's economy. I look forward to updating you on the progress of the museum expansion.

All of our efforts in 2016, from educational programs to collections acquisitions to historic preservation, were made possible by people like you. It is the visitors, donors, members, volunteers, and digital audience that make NISHM a success. I thank you for your interest and support, and hope that you will stay with us through the exciting times ahead.

## Report from the Executive Director

The National Iron & Steel Heritage Museum has been adding depth to its programming in recent years, including displays and exhibits of Lukens' products and the equipment used to produce them. In the following pages we will share an overview of those programs through our lectures, trips and exhibits. We share stories of iron and steel and, hopefully, inspire you to discover more about the people, process and products made in Coatesville and beyond.

Science and technology, history and events - NISHM has it all and is a special place and is made better by you, our friends, and donors, who enable us to provide fresh educational programming and activities for our visitors and our community.

Over the past year there has been a whirlwind of activity at NISHM. Many things are easy to spot, however an amazing number of tasks have been completed behind the scenes. Considering all that has been accomplished, a big thank you goes out to all the volunteers who have dedicated hundreds of hours. We appreciate their passion and dedication to NISHM.

At NISHM we strive for authenticity and our hope is that when you read about the museum, the experiences are not overstated. After you visit we hope you will feel pleasantly surprised that your experience exceeded expectations, because we would love for you to return with friends.

We welcome your feedback. Please write to us and let us know what you think about NISHM. If you've had a chance to visit, please tell us about your experience. We want to hear from you!

# The Lukens National Historic District

Our history is painted with many brushes — the evolution of steelmaking and products that kept pace with a growing nation; and the spirit of the men and women of steel marked in the homes, art and artifacts we hold in safekeeping.

1. Start your visit at the **Lukens Executive Office** (circa 1902-03) by taking an annual report worthy photo on the impressive staircase. Enjoy the steelmaking dioramas, Grutzka art collection and gift shop.

2. The **Grutzka Collection** may be the most comprehensive essay of America's great industrial age. Today, more than 90% of the structures he painted no longer exist.

3. A.F. Huston's **Graystone Mansion** (circa 1889) embodied the gravitas of a steelmaking dynasty. Available for special events.

4. The success of Rebecca Lukens' mill is evident in **Terracina** (circa 1849), the home of her daughter, Isabella. Open to the public as a furnished 1880 house museum.

5. Our current restoration project **Brandywine Mansion** (circa 1739) was home to America's first female industrialist, Rebecca Lukens.

6. The restored **Tenant House** (circa 1880) was typical of housing provided for workers of that era. Closed to the public.

7. After years of service at Lukens, our **1965 International Travelall Ambulance, 1947 Dodge Fire Engine** and a **1965 GMC Fire Engine** still look ready to roll!

8. The **120" Rolling Mill** was an active Lukens production facility from 1942 to 1985. Closed to the public.

9. The **Steelworkers' Memorial** features a World Trade Center Tree made from Lukens' steel. This memorial commemorates steel workers and first responders who gave their lives in service.

10. Our **Sonarsphere** was manufactured in 1984 to hold 1,245 hydrophones on a nuclear submarine. It was the first Lukens Steel product to return home.

11. The **1911 Porter Steam Locomotive** was the workhorse of a turn of the century steel mill.

## Our History

The Graystone Museum Society of Coatesville was incorporated in 1984 and began planning a room in the then City Hall, Graystone Mansion, as a museum area. Shortly after its formation, the Society's attention was diverted to Terracina, its first real estate acquisition, the 1850 home of Dr. Charles and Isabella Huston — parents of A. F. Huston — and later the home of Stewart Huston. Working with the City, and with the Huston Estate, the Society agreed to fill the need for a non-profit group to take on the management and general restoration of Terracina in late 1985.

With financial support coming primarily from the Huston Foundation, the Society began the stewardship care and restoration of the house. With the establishment of The Stewart Huston Charitable Trust in 1990, the Society received major grants which allowed for many important restoration projects: roofing, heating, wiring, plumbing, air conditioning, etc., as well as restoration of the interiors to period appearances. The current plans for Terracina are to develop a house museum dedicated to the Huston family of Coatesville and their other related family branches.

The City decided to erect a new municipal office building and police station and moved out of Graystone mansion in 1992. Designed by noted Philadelphia architects Cope & Stewardson and recognized as the most architecturally significant house ever built in Coatesville, Graystone was much too important for the heritage of the city and region to risk its loss. With the support of the then management of Lukens Steel Company, the City agreed to transfer the property to the

Graystone Society in 1995. With funds from the Lukens Foundation, the Society was able to do a major clean-up of the buildings and grounds, as well as initiate an architectural and engineering study of the buildings by Dagit-Saylor Architects from Philadelphia. The Society currently uses the mansion for social events, meetings, concerts, and of course, tours.

In 1988 the National Trust for Historic Preservation through their Comprehensive Historic Assistance Program for Historic House Museums compiled a report for Terracina. This

report concluded that the Graystone Society needed to expand its mission beyond just preserving Terracina to reflect a broader purpose: the iron and steel industry and its role in the development of the community. After acquiring Graystone Mansion, the Graystone Society commissioned Dagit-Saylor to conduct a feasibility study for the restoration needs of the

*The Graystone Society started in the Graystone Mansion in 1984.*

House.

In 1994, the National Park Service of the United States Department of the Interior bestowed its highest designation on the buildings of the Lukens Historic District — Brandywine Mansion, Terracina, Graystone, and the Lukens Executive Office Building — naming it a National Historic Landmark.

While the Lukens Foundation continued to grant the Graystone Society the funds needed to operate Graystone Mansion, they also began pursuing the concept of a broader vision in a steel museum. After touring other national industrial manufacturing sites with museum components, Lukens recommended Dagit-Saylor to conduct

a feasibility study for a steel museum complex, which was completed in 1996. However, shortly after the completion of this study, Lukens, Inc. was sold to Bethlehem Steel Company in 1998. The third and most prominent building in the Historic District came under local control when The Stewart Huston Charitable Trust bought the Lukens Main Office in 2000 from Bethlehem, allowing the Graystone Society to conduct tours of this important structure. At this time, Gateway Park was developed, securing the Historic District's northern end. Finally, in 2006, the Stewart Huston Charitable Trust acquired Brandywine Mansion, the home of Rebecca Lukens and immediately transferred it to the Graystone Society securing ownership of all the structures in the Lukens National Historic District.

In 2001, the steel museum plan of 1996 was revisited and, after much discussion, led by nationally recognized museum planner Harold Skramstad, a more sustainable vision was created for the site in 2003/2004. Further, an interpretive plan was completed by McKelvey Museum Services, bringing an educational focus to the museum. Building upon these efforts, the Society is working with The Stewart Huston Charitable Trust and the Huston Foundation, as well as the City, to create the National Iron and Steel Heritage Museum — a major endeavor which would utilize former mill buildings and a circa 1890's rolling mill adjacent to the house and office properties.

The Graystone Society has been adding depth to its programming for the last number of years including displays of Lukens' products and the equipment used to produce them. In 2002 and 2004 scientific test lab equipment from the G.O. Carlson Company was added to our collection. We began preserving the history of safety at the mill in 2002 by acquiring a 1965 International Travelall ambulance. In 2005 we located and acquired a 1947 Dodge fire truck followed by a 1965 GMC fire truck in 2008. Also in 2008 we built and dedicated a storage facility to house the safety equipment

*Terracina was the first real estate holding of the Graystone Society*

and the G.O. Carlson collection. In 2004 we located a narrow gauge railroad engine of the type previously used at Lukens and developed an outdoor display for it along with ingots and scrap pans indicative of its use in the plant. In 2007 we installed the informational signage for our exterior walking tour. Also in 2007 we acquired and returned to Coatesville a 1980's era Sonar Sphere, a 15' diameter 27 ton steel dome that was manufactured by Lukens Steel for the US Navy and used in the sonar listening systems of nuclear submarines.

In April of 2010 we successfully acquired and returned to Coatesville 500 tons of steel, including ten Tridents, or Trees, used in the bases of the World Trade Center Towers which were melted, rolled and flame cut here at Lukens. Planning is currently underway for the display of the steel as a central part of the National Iron and Steel Heritage Museum.

In 2010, the Graystone Society commemorated 200 years of the iron and steel industry in Coatesville. A highlight of the Society's June 26th event was the unveiling of a brass plaque mounted on a steel ingot donated by ArcelorMittal. The marker was placed near an historic section of the plant that included the original open hearth building where steel was first made at Lukens in 1892. A second event was held on July 2nd — the date of Isaac Pennock's purchase of the land from Moses Coates in 1810 — with a memorial

rose-planting ceremony at Brandywine Mansion, the home of Rebecca Lukens and the starting point of the Lukens National Historic District.

Progress in the areas of historical preservation, education and community are marked in 2012 when Harcum College began classes at Graystone, the Klaus Grutzka Industrial Art Collection was acquired and Phoenix Iron & Steel Co. blueprints were added to collections. The Brandywine Mansion Historic Structures Report was completed in 2013.

On November 21, 2016 the National Iron & Steel Heritage Museum (NISHM) proudly announced the acquisition of two historic mill buildings, as a gift from ArcelorMittal. The two buildings, known as the 120" rolling mill and the motor house, will expand the museum area and will be key factors in the revitalization of Coatesville, by renovating former steel production buildings into a museum centered on the story and science of iron and steel manufacturing. The combined space of over four acres in both buildings will add immense exhibit and programmatic space to this education-based museum. The new space will focus on visitor displays, large-scale exhibits and artifacts of iron and steel processes, products and people.

*Students learn about manufacturing steel by viewing scale models of rolling mills and spinning machines.*

While ArcelorMittal and its predecessor companies have been continuously producing iron and steel in Coatesville since 1810, these two buildings were built as part of the WWII war effort, where steel for battleships, aircraft carriers, submarines, as well as destroyers, landing craft, and tank parts was manufactured. Production was halted at these sites in 1982 when the actual rolling mill was moved to another plant in Conshohocken (the former Alan Wood Steel Plant, now owned and operated by ArcelorMittal). The acquisition of these buildings began over 20 years ago in the fall of 1995, when then-Lukens Steel and the Graystone Society had the idea to reuse an industrial building on the plant grounds for community purposes.

National Iron and Steel Heritage Museum has enormous potential to provide educational, tourism, and economic stimulation for the urban revitalization efforts of the Coatesville community.

*Over forty years ago, The World Center Trees were made from Lukens' steel. Since their return home, they have been a moving reminder of 9/11.*

**2015** Brandywine Mansion phase I roof replacement completed

**2016** 120" Mill and Motor House buildings acquired

## Historical Buildings & Displays

### Brandywine Mansion (circa 1739)

Brandywine Mansion dates to the mid-1700s. In 1788, Moses Coates added the larger west section. Rebecca Lukens lived in the house until her death in 1854. Much later, Brandywine Mansion became part of Lukens' Company Store. Currently the building is being interpreted to make the renovations as authentic as possible.

**Phase 2 restoration continued in the spring of 2016 with the south wall masonry stabilization at the joint between Period I (c. 1739) and II (c. 1787) structures and rebuilding the removed south half of the first-floor wall.**

### Tenant House (circa 1880)

Located between Terracina and the 120" Mill, the building is typical of housing built for steel workers. This house was erected in 1880 next to a barn. It was later occupied by the chauffeur/butler of Stewart and Harriet Huston. The interior of the Tenant House has been completely restored.

**Landscape work around the property was undertaken in 2016**

### Terracina (1849)

Built in the Country Gothic style, the exterior displays Gothic Revival features, including latticed piazzas, peaked wall dormers and diamond-paned lancet windows. A two-story, Renaissance Revival bay was added to the south side of the house in 1875.

**A new standing seam front porch roof was installed, with repairs to the fascia and soffit. Repairs were made to sidewalks and steps. The outhouse/privy had a cedar shingle roof replacement and an exterior wall repainting during 2016 .**

Open to the public as a circa 1880 house museum.

### Graystone Mansion (circa 1889)

A.F. Huston built Graystone in 1889 and lived there until his death in 1930. Sold to the City of Coatesville in 1938, Graystone served as City Hall until 1992. Philadelphia architects Cope & Stewardson designed Graystone employing Collegiate Gothic styling, which the firm initiated and used on several college campuses.

**Porch railings were added, and roof repairs were made. Striping the parking lot was done in 2016.**

Open to the public for special events and exhibits.

**Carriage House** (circa 1889)

The Carriage House is located behind Graystone Mansion, and was built to house the horses and carriages of the family. When the Graystone Mansion was sold to the City of Coatesville, the Carriage House became the city jail and police headquarters.

**No substantial work was undertaken in 2016**

Not open to the public.

**Lukens Executive Office Building** (1902-1903)

The directors of Lukens Iron & Steel Company voted in 1900 to construct a new office building. Cope & Stewardson, again were retained, in this case using the Georgian Revival style. The building is owned by the Stewart Huston Charitable Trust and houses the administrative offices of the Graystone Society.

**In 2016 a Weil-McLain gas-fired boiler was installed to replace a 1980s era boiler.**

Open for tours of the building and exhibits.

**120" Mill and Motor House** (1942-1943)

These two buildings were built as part of the WWII war effort, where steel for battleships, aircraft carriers, submarines, as well as destroyers, landing craft, and tank parts was manufactured. Production was halted at these sites in 1982 when the mill stands were moved to the Luken Conshohocken plant.

The combined space of over four acres in both buildings will add immense exhibit and programmatic space to this education-based museum. The new space will focus on visitor displays, large-scale exhibits and artifacts of iron and steel processes, products and people.

Not open to the public at this time.

**Steelworker's Memorial** (2013)

ArcelorMittal installed the Steelworkers' Memorial in the summer of 2013 to commemorate those who have perished in the steel mill as well as those who gave their lives in the line of duty on September 11, 2001. The memorial includes one of the "tridents" that was shaped by Lukens Steel before they were constructed as the base of the World Trade Center in New York City. The Museum arranged the return of ten of the original steel tridents home to Coatesville

Open to the public 24 hours a day.

## Acquisitions & Collections

An important part of The Graystone Society's mission is to collect and care for items that help us preserve our heritage. Graystone is an actively collecting organization. A REALLY actively collecting organization. Not a week goes by without objects or donations appearing on the "new accessions" table. In 2016, The Society collected items spanning over 200 years of the history of Coatesville and the American iron and steel industry. We have accessioned some surprisingly diverse items. From a life preserver to issues of Lukens Life; from books and badges to hard hats and handbooks- even a collection of 757 late 19th century travel postcards that spanned the globe. All became part of our ever expanding collections. It is exciting to be part of an institution that so many people willingly entrust with their possessions. So keep bringing them in. We will proudly preserve and care for each and every one.

*Clockwise From Above:*

*2016.18.2 Chair yellow rush seat belonged to Isaac Pennock, donated by Elise Sheffield*

*Items from Phoenix Steel – 2016.25.1 Phoenix Steel parking pass, 2016.25.2 Phoenix Steel shipping ticket, 2016.35.3 booklet- Contract Rules between Phoenix Steel& United Steel Workers 1954, donated by LeAnne Zolovich*

HERITAGE MUSEUM

## Unique Support Opportunities

### THE LUKENS NATIONAL HISTORIC DISTRICT

## *Properties Available to Rent for Special Events*

Three distinctly different properties within the Lukens Historic District are available for rental. Each offers the convenience of complimentary on-site parking, handicap access and nearby major thoroughfares. Patrons have flexibility with the option to choose their own caterer, hire their own event planner, or do it all themselves — we provide the canvas and they create an event to remember.

Graystone Mansion

Lukens Executive Office Building

The Grounds at Terracina

The perfect place for...

weddings / rehearsal dinners / bridal showers / reunions / baby showers / teas / dinner parties  
birthdays / business meetings / corporate retreats / luncheons / fundraisers

### THE GRUTZKA INDUSTRIAL ART COLLECTION

## *Paintings Available for Adoption*

#### THE ADOPT-A-PAINTING INITIATIVE

Select pieces are available for adoption at \$500, \$1,000, \$2,500, \$5,000, to benefit conservation efforts for the entire collection. A brass plaque on display with the painting recognizes the donor.

Graystone Society, Inc.

*Located in the Lukens National Historic District*
